

Response to the Friends & Family Survey June 2017

The Friends & Family Test is a survey commenced in December 2014 and is an on-going survey throughout the NHS. The results of the survey are published both on the website and in the waiting area on a monthly basis. You can access the survey at any time via our website at www.kennethmacraemedicalcentre.co.uk or in paper format from the waiting room or any of the consulting rooms during or following consultation.

During June 2017 two forms were submitted via paper format and 0 submitted electronically. Both patients indicated they were “**Extremely Likely**” to recommend our Practice to friends & family.

Thank you for taking the time to complete the survey.
